

Marine Generator

Model – FP1D18kW

18 kW

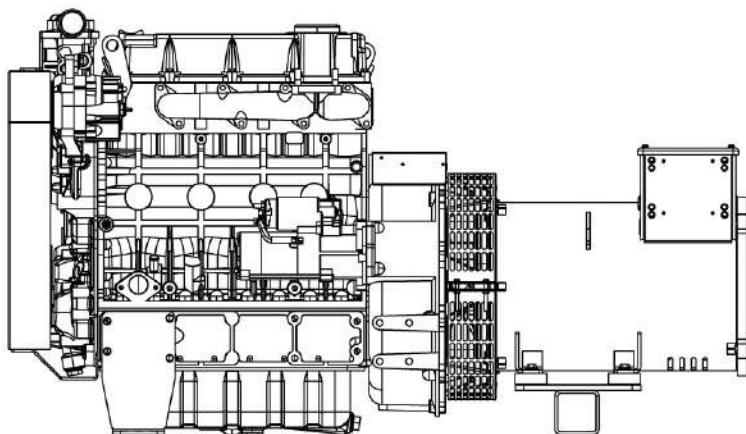

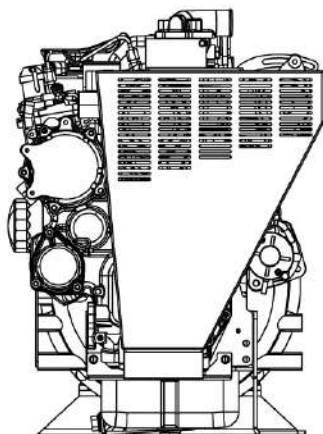

Specification

Power	18 kW
Voltage	120 Volts – 100 Amps 240 Volts – 200 Amps
Engine	Kubota V2203
Alternator	Stamford NSOL2-M1
Instrumentation	Control Panel with Mechanical Gauges
Dimensions (L x W x H)	47.96" x 29.62" x 26.43"

Generator Dimensions

Engine

Make	Kubota
Model	V2203
Type	Diesel
Power	18 kW
Emissions	U.S. EPA TIER 3
Cylinders	4
Aspiration	Naturally Aspirated
Displacement	2.197L / 134.1 cu.in
Cooling System	Water Cooled
Cold Starting Aid	Glow Plugs
Warranty	Standard Warranty

Options

Fernandes Power marine generators are available in different configurations and power ranges to meet your electrical power needs.

KEEL COOLED MARINE GENERATOR

A special care is taken in designing this marine generator.

This generator comes standard with below features.

- Four Point Isolation Mounts
- Start/stop panel with pressure, temperature and hour meter gauges.
- 30ft control panel harness
- Safety shutdowns for low oil pressure and high coolant temperature.
- Exhaust Manifold Blanket
- Coolant Expansion Tank
- Front Belt Shield
- Electric Fuel Transfer Pump
- Permanently engine mounted manual oil sump pump.

This product is designed to withstand the harsh environments found at sea, including saltwater corrosion, rough waves, and extreme temperatures.
